QiangLong Machinery Co., Ltd. is a national high-tech enterprise mainly specialized in designing, developing, and manufacturing Knitting Machinery. The company is located in New & Hightech Industrial Park in the city of [Computerized Flat Knitting Machine Suppliers] Tongxiang, which is one of the national historic and cultural

cities. QiangLong covers an area of over60,000 square meters and the floor area of 80,000 square meters. Based on independent innovation and considerate service, QiangLong has been supplying clients with high-tech and qualified products as well as customer-oriented service for ShoeUpper Knitting Machine meeting various demands.

We set up many brands with various specifications for multifunctional Computerized Flat Knitting Machines like“QiangSheng", After several years of R&D and market exploitation, QiangLong has established a perfect marketing network and after-sales service system. While holding the tenet of“People-oriented, Sincere service, Technology promotes developments and Service creates brands” in mind, QiangLongdevotes to enrich culture connotation, enhance products' value, expand market share, and achieve its economic liftoff.

Single System Computerized Flat Knitting Machine Series

The single-system flat knitting machine has two types of needle beds: milling type or insert type. This series has two models: with a comb or without a comb. This series adopts digital technology, which can realize the functions of transfer, tuck, hole picking, jacquard, needle narrowing, and other regular pattern knitting functions of the flat knitting machine. This series can weave basic knitting patterns (full needle, single side, Etc.), multi-color irregular jacquard, and twisted weft knitting. This series is suitable for knitting sweaters, scarves, hats, and clothing accessories from raw materials such as silk, spun silk, synthetic filament, wool, rayon, blended yarn, yarn, Etc.

Multifunctional Computerized Flat Knitting Machine

The Device for Laying Down Fabric: The Spring-type intelligent moveable sinkers, this function can replace the function of the market rake, so as to effectively control the local tension of the cloth, this function is convenient to maintain, can greatly reduce the broken needle caused by the floating yarn.

Braiding Design: Optimize weaving, part shovel 60+ needles, deeper necklines 12cm+ with better control over flechage, drum wave 4cm+, to solve the difficulty of deeper necklines limitation.

Cost: Capacity improvement, energy consumption reduction, cost recovery faster, more complete function, car without worry, welcome to sample to buy, carry the bag, a variety of financial ways.

Luxury Model with Double Tuck

It has the function of simultaneous weaving tucks with single-port input, and realizes the function of turning before and after single-port input.

The system software has the function of stitchs step by step and can be compatible with most pattern weaving of double and triple system.

Simple operation, saving time, less investment, fast return. Qianglong technology wish to work with you to win the future together.
